Introducing the all new TruFire Precision Print System (PPS) by DigiTech

- The most durable and flattest machined vacuum table designed to maintain the highest flatness requirement in the industry.
- X axis accurate across the bridge to 1 micron, Y axis is accurate to 1 micron on both sides of the gantry.
- Absolute print head alignment and software to aid in perfect head alignment.
- Uninterrupted ink system. NO dropout – any density, any print mode.
- True, 3-level grayscale printing with breathtaking quality and unprecedented efficiency.
- TruFire PPS is an interactive user interface to give operator complete control.
- Efficient, environmentally friendly LED UV curable lamps.
- LED inks with unparalleled adhesion qualities.
- Simplified to eliminate service cost.
- Automatic media height laser.
- Print substrates up to 6 inches thick.
- Hardware and software made in America.
- Up and running within just a few hours from installation.

The TruFire “True” flatbed printer is a totally new design that has the highest accuracy standards possible.

We set out to develop and manufacture a complete print system to be durable and reliable, but also incredibly accurate. The TruFire offers “print on demand” capability all day with minimal maintenance. We believe the user shouldn’t feel the need to have a service contract to keep the printer running. At DigiTech, we do things better – and we’ve been doing it proudly for 10 years running.

We make happy customers.
